Altair Panel

Acoustic Lighting Solutions

Where acoustics meet atmosphere. Combining precision sound absorption with dynamic, tunable lighting in one intelligent panel.

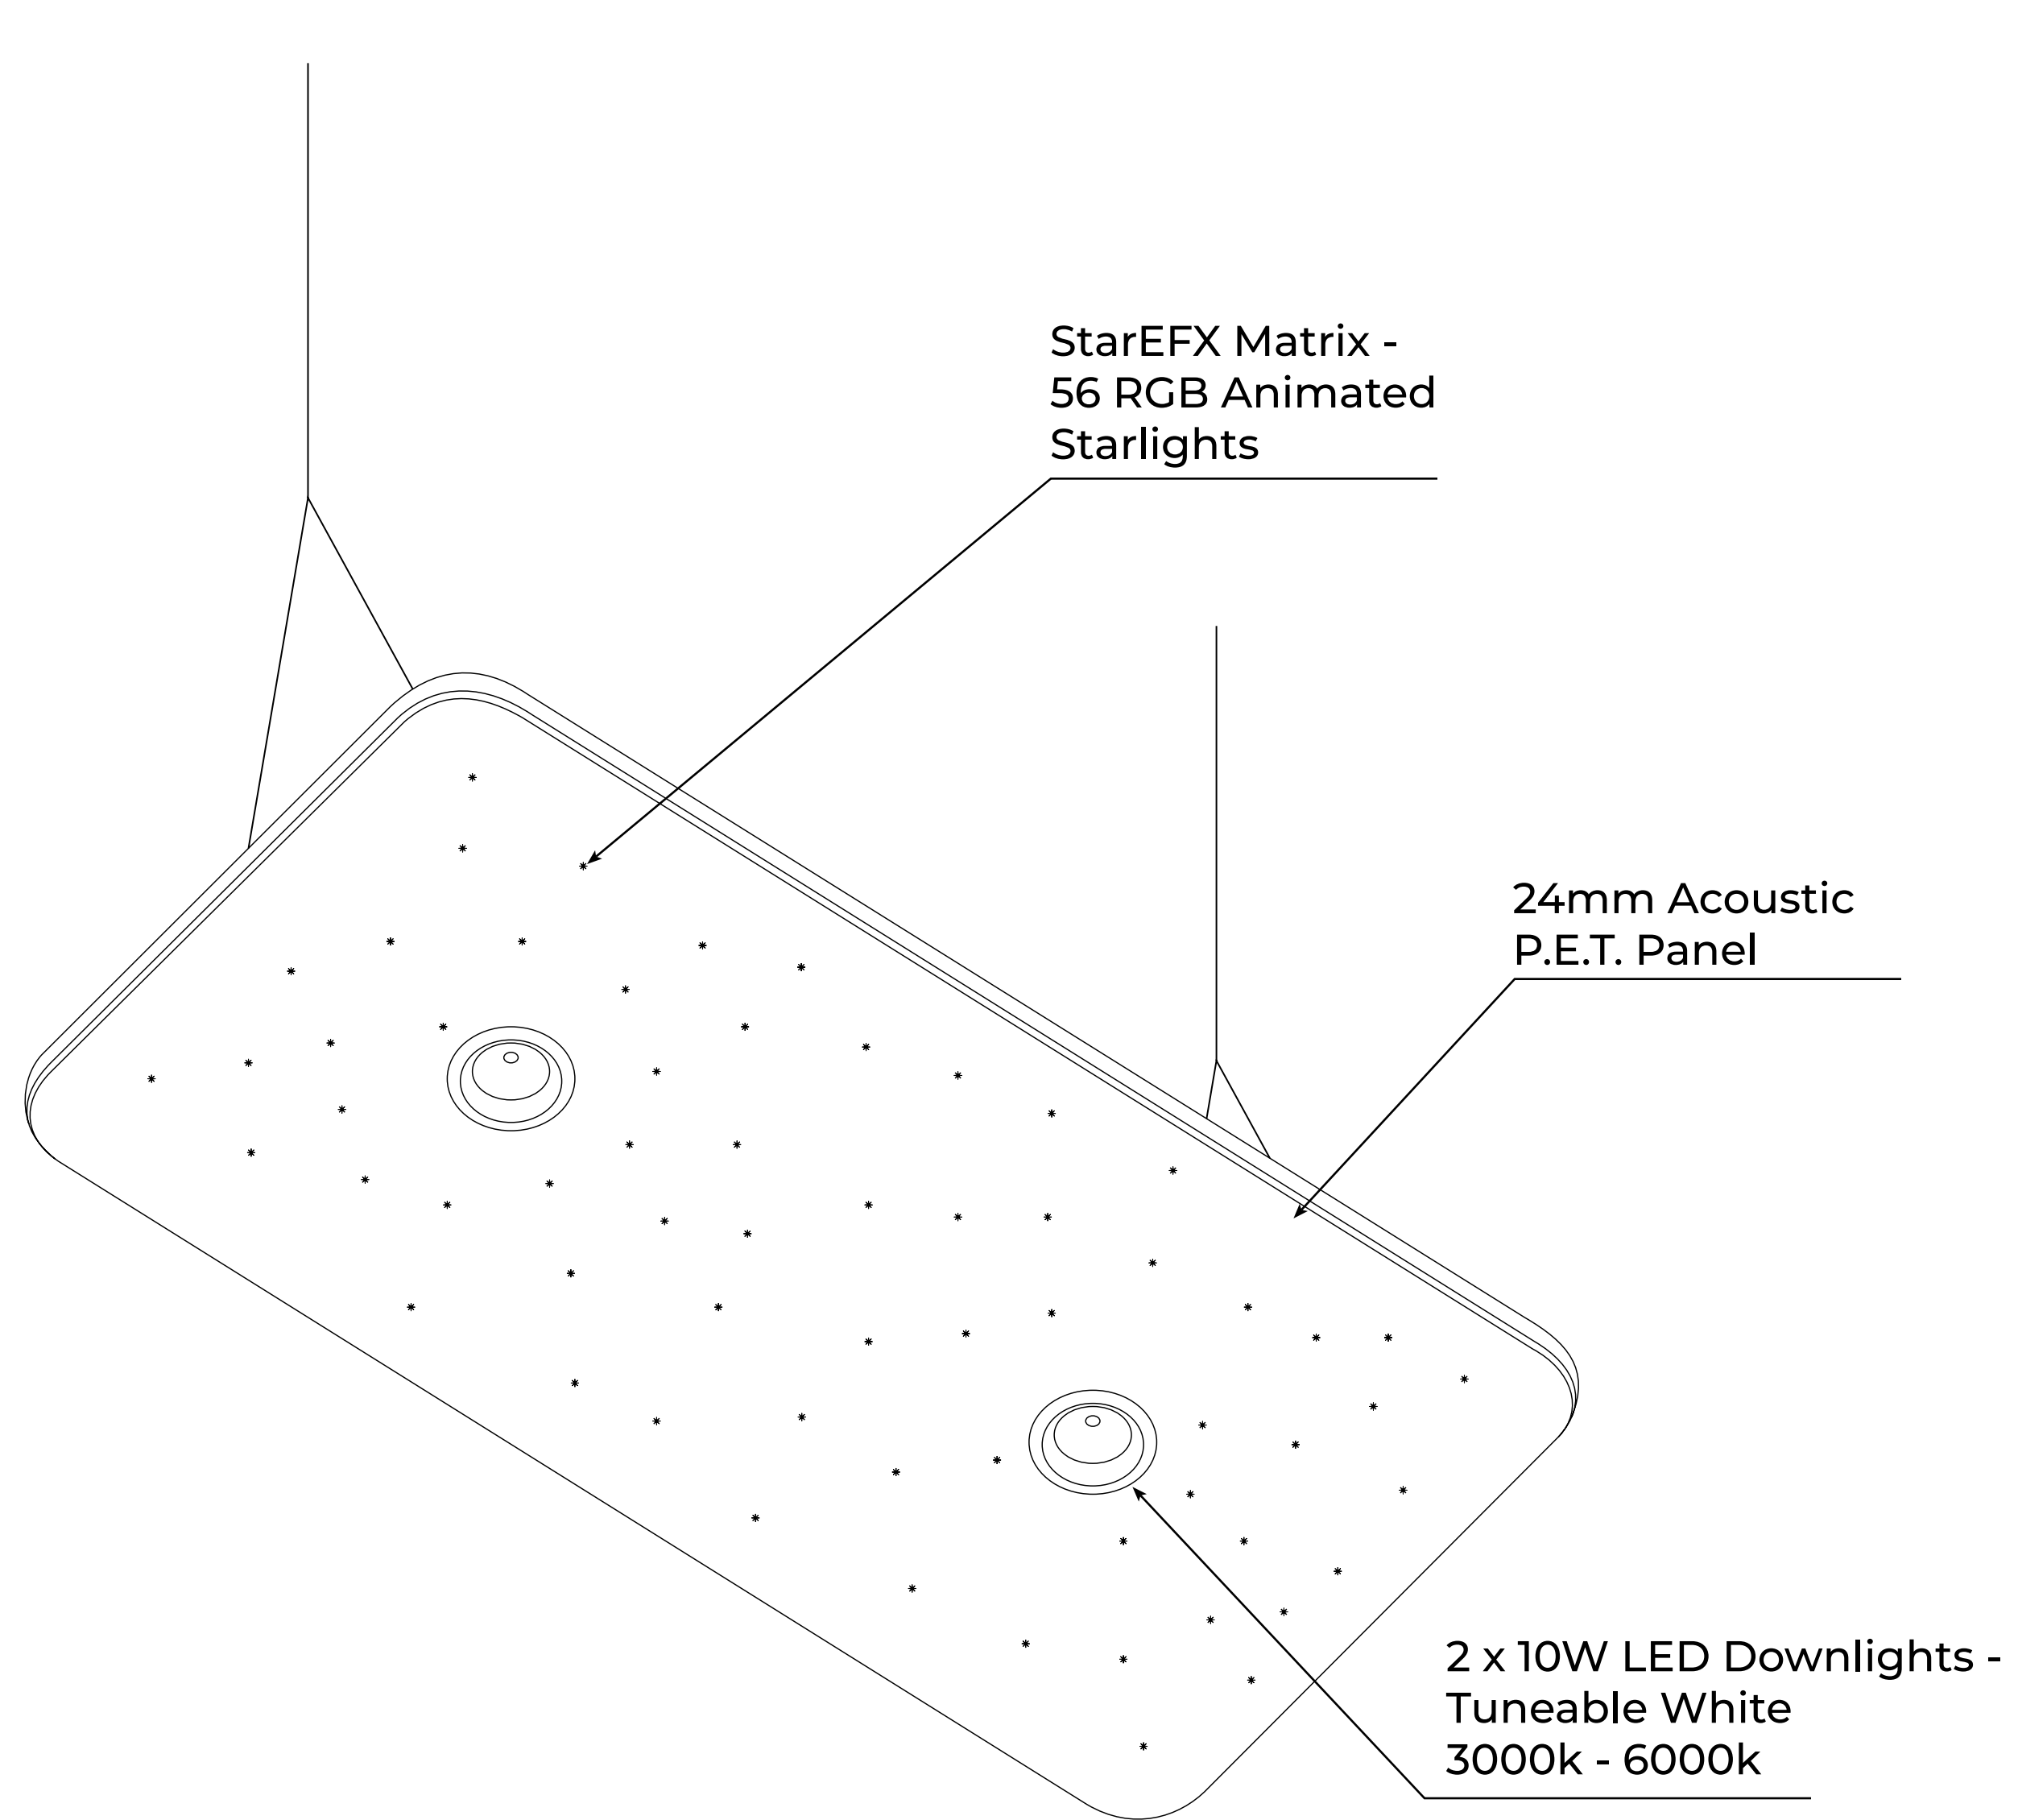

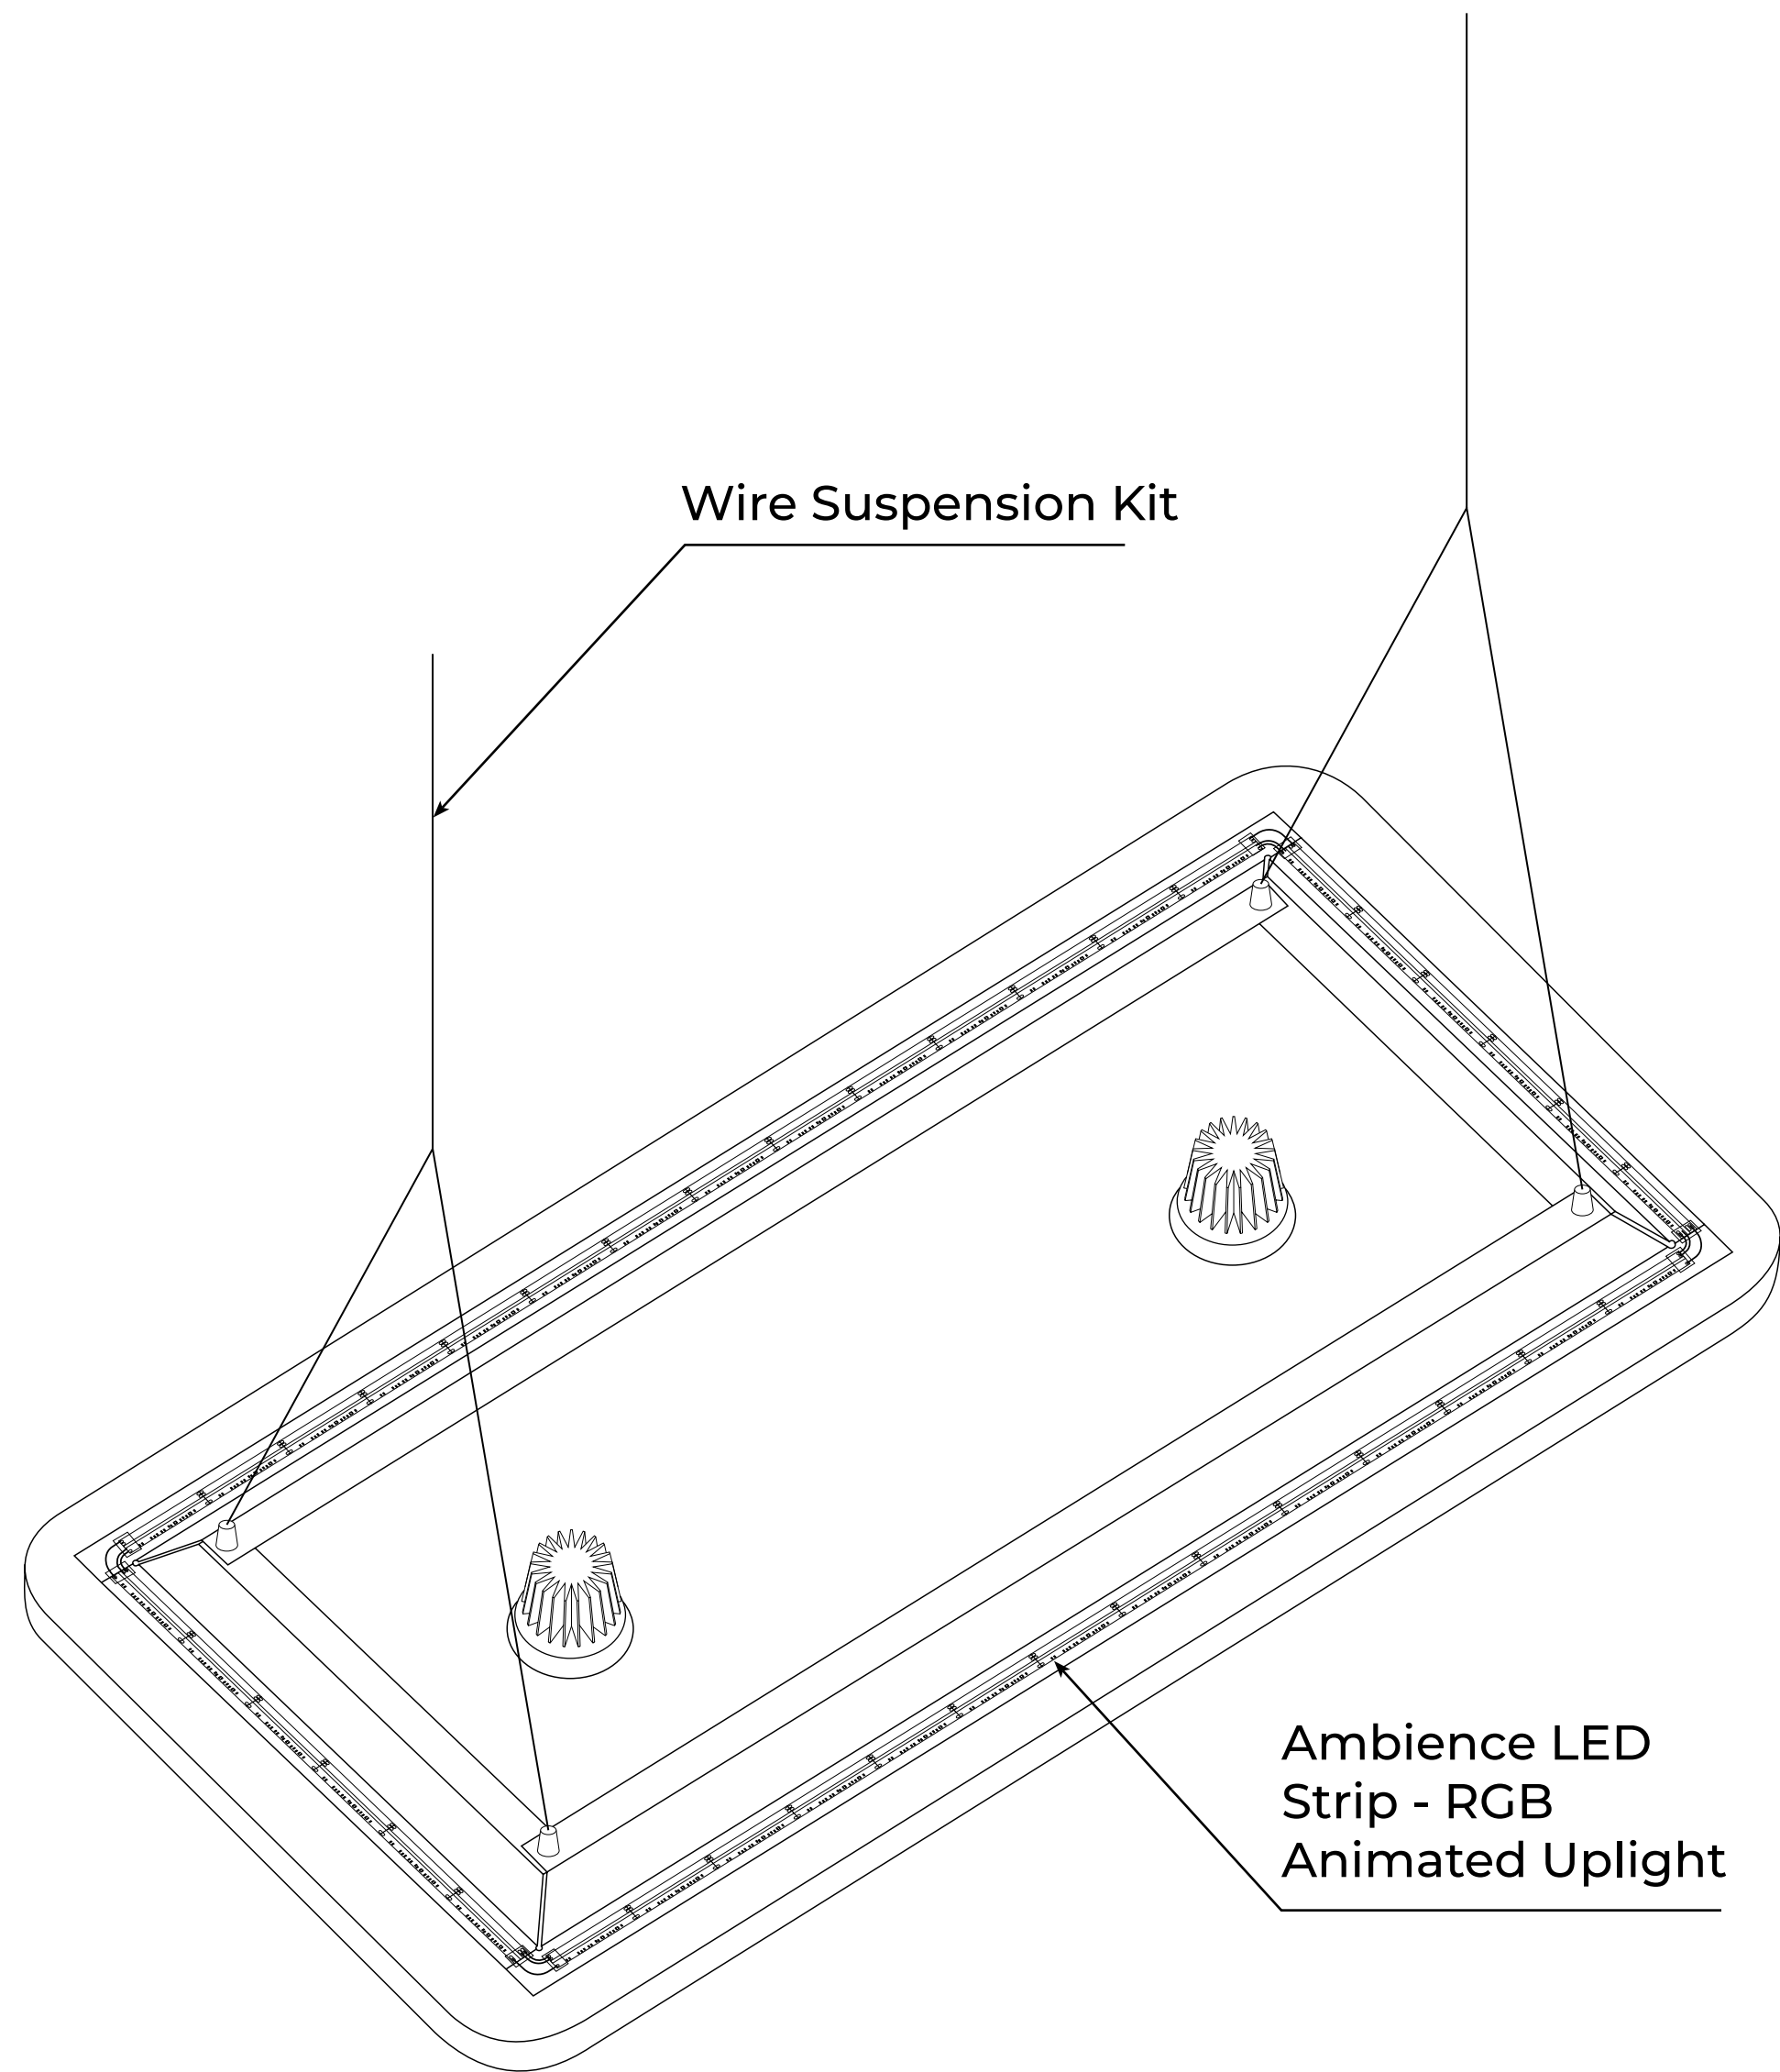

From Calm to Cosmic.

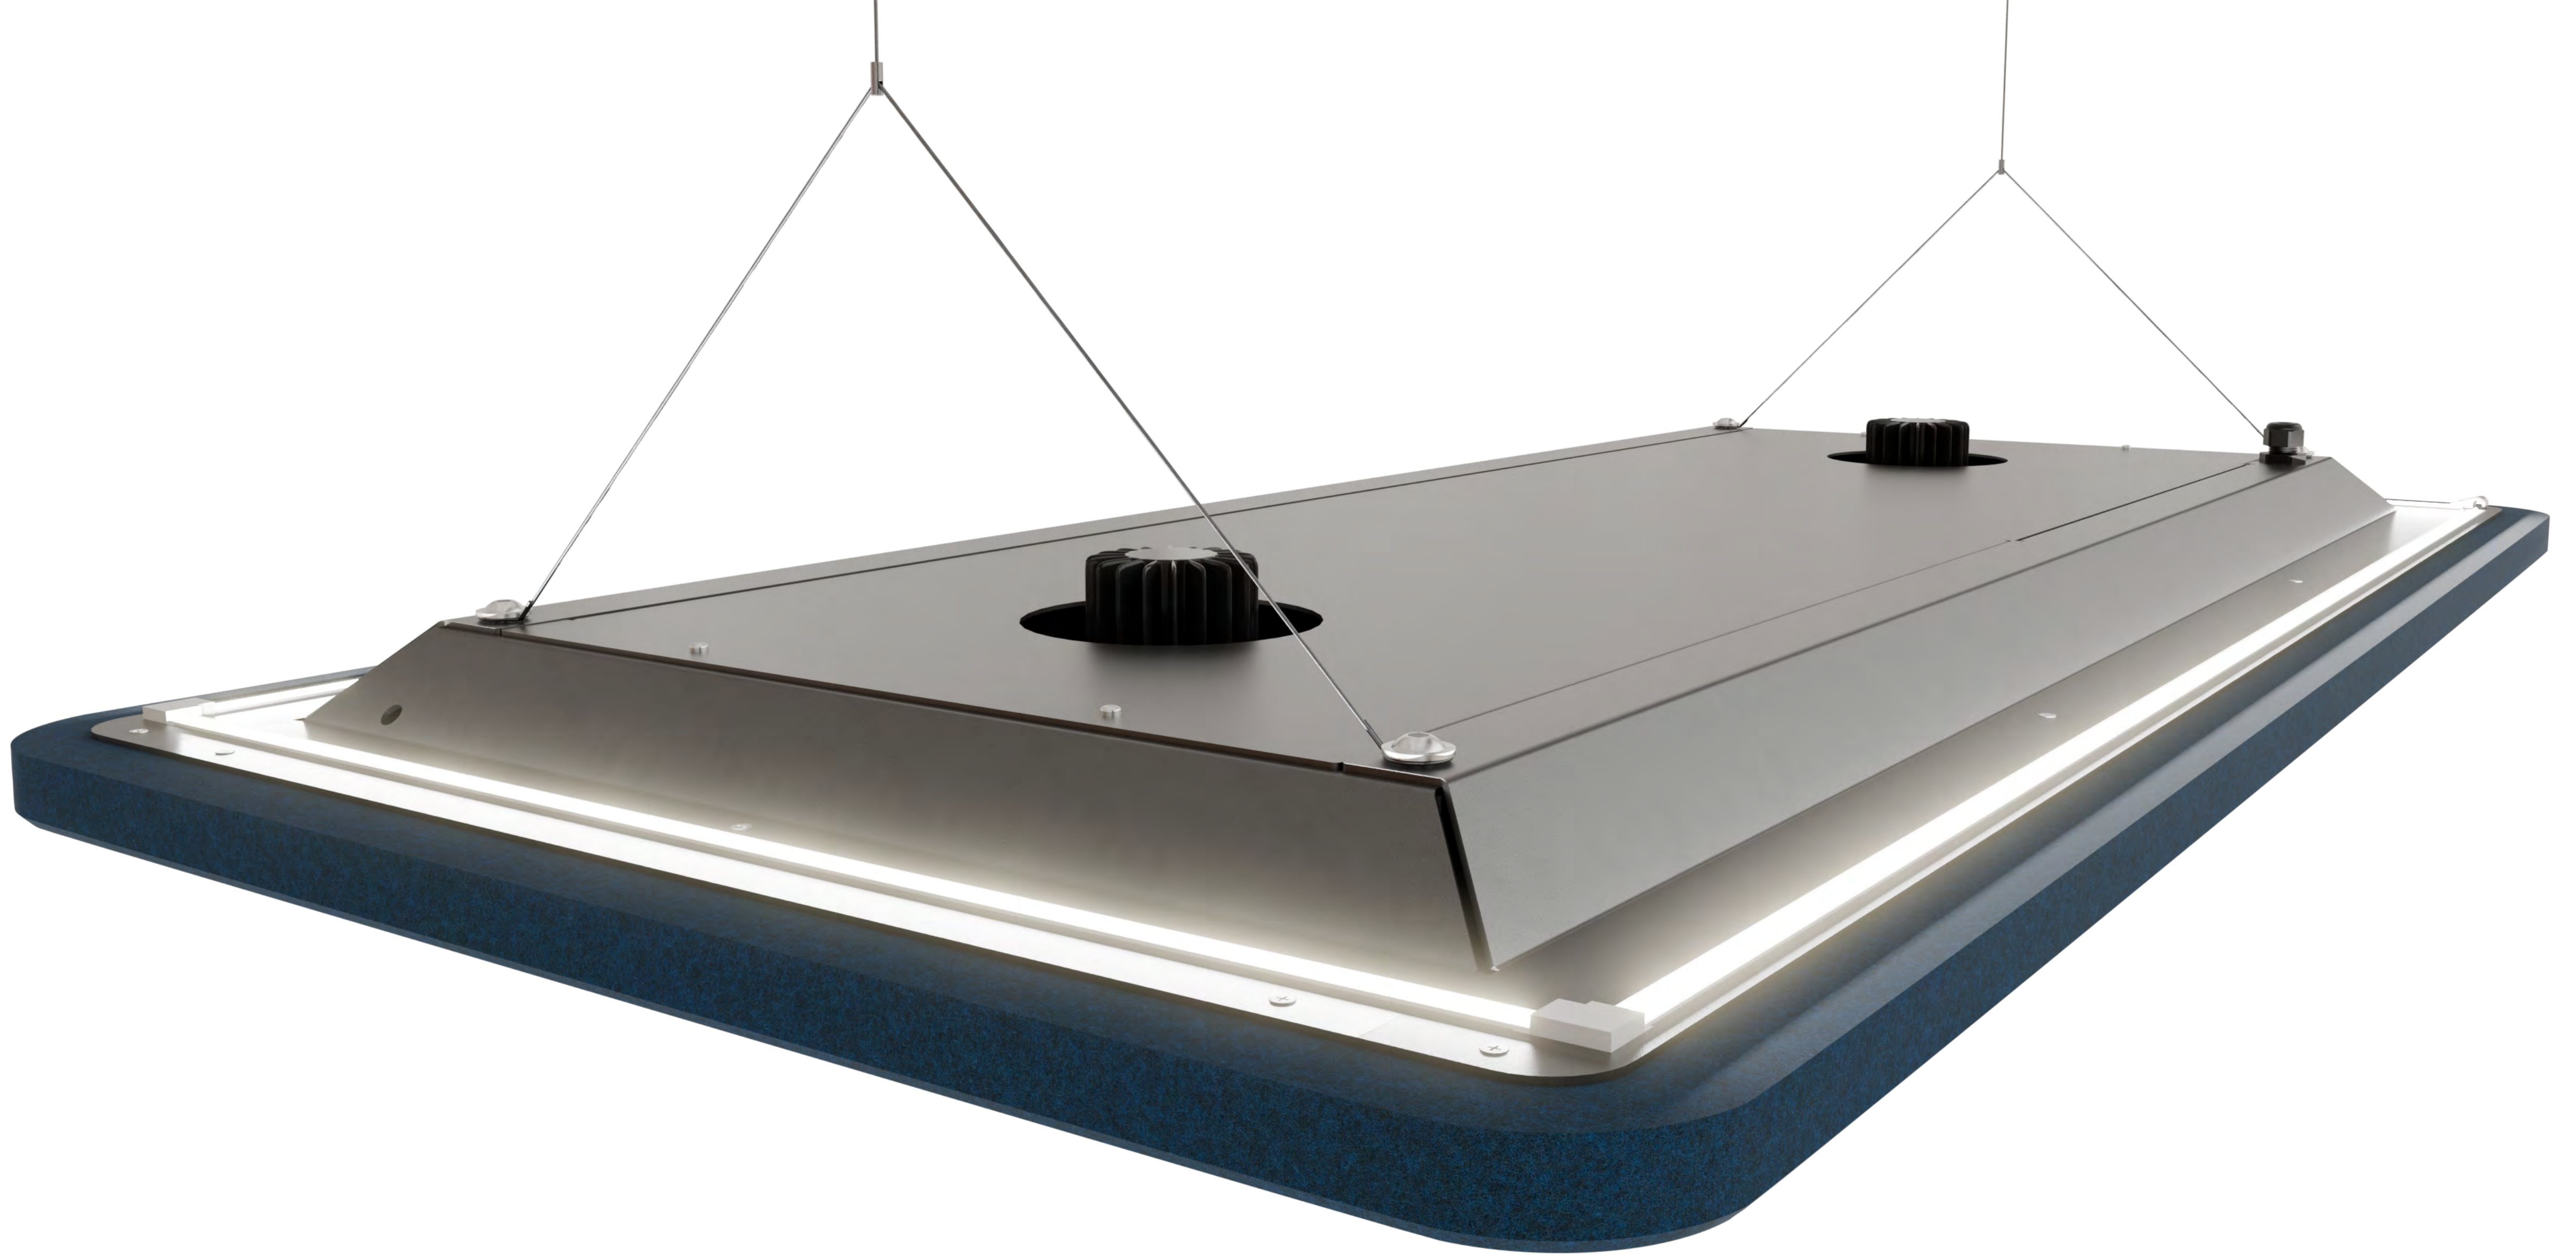

The Altair Panel gives you complete control over the atmosphere of a room, shifting effortlessly from soft, soothing light for quiet moments to vibrant, expressive colour that energises and transforms the space. With tunable RGB illumination and integrated starlight effects working in harmony, it creates anything from subtle ambience to dramatic visual impact. All from a single, beautifully engineered system.

One System, Infinite Moods

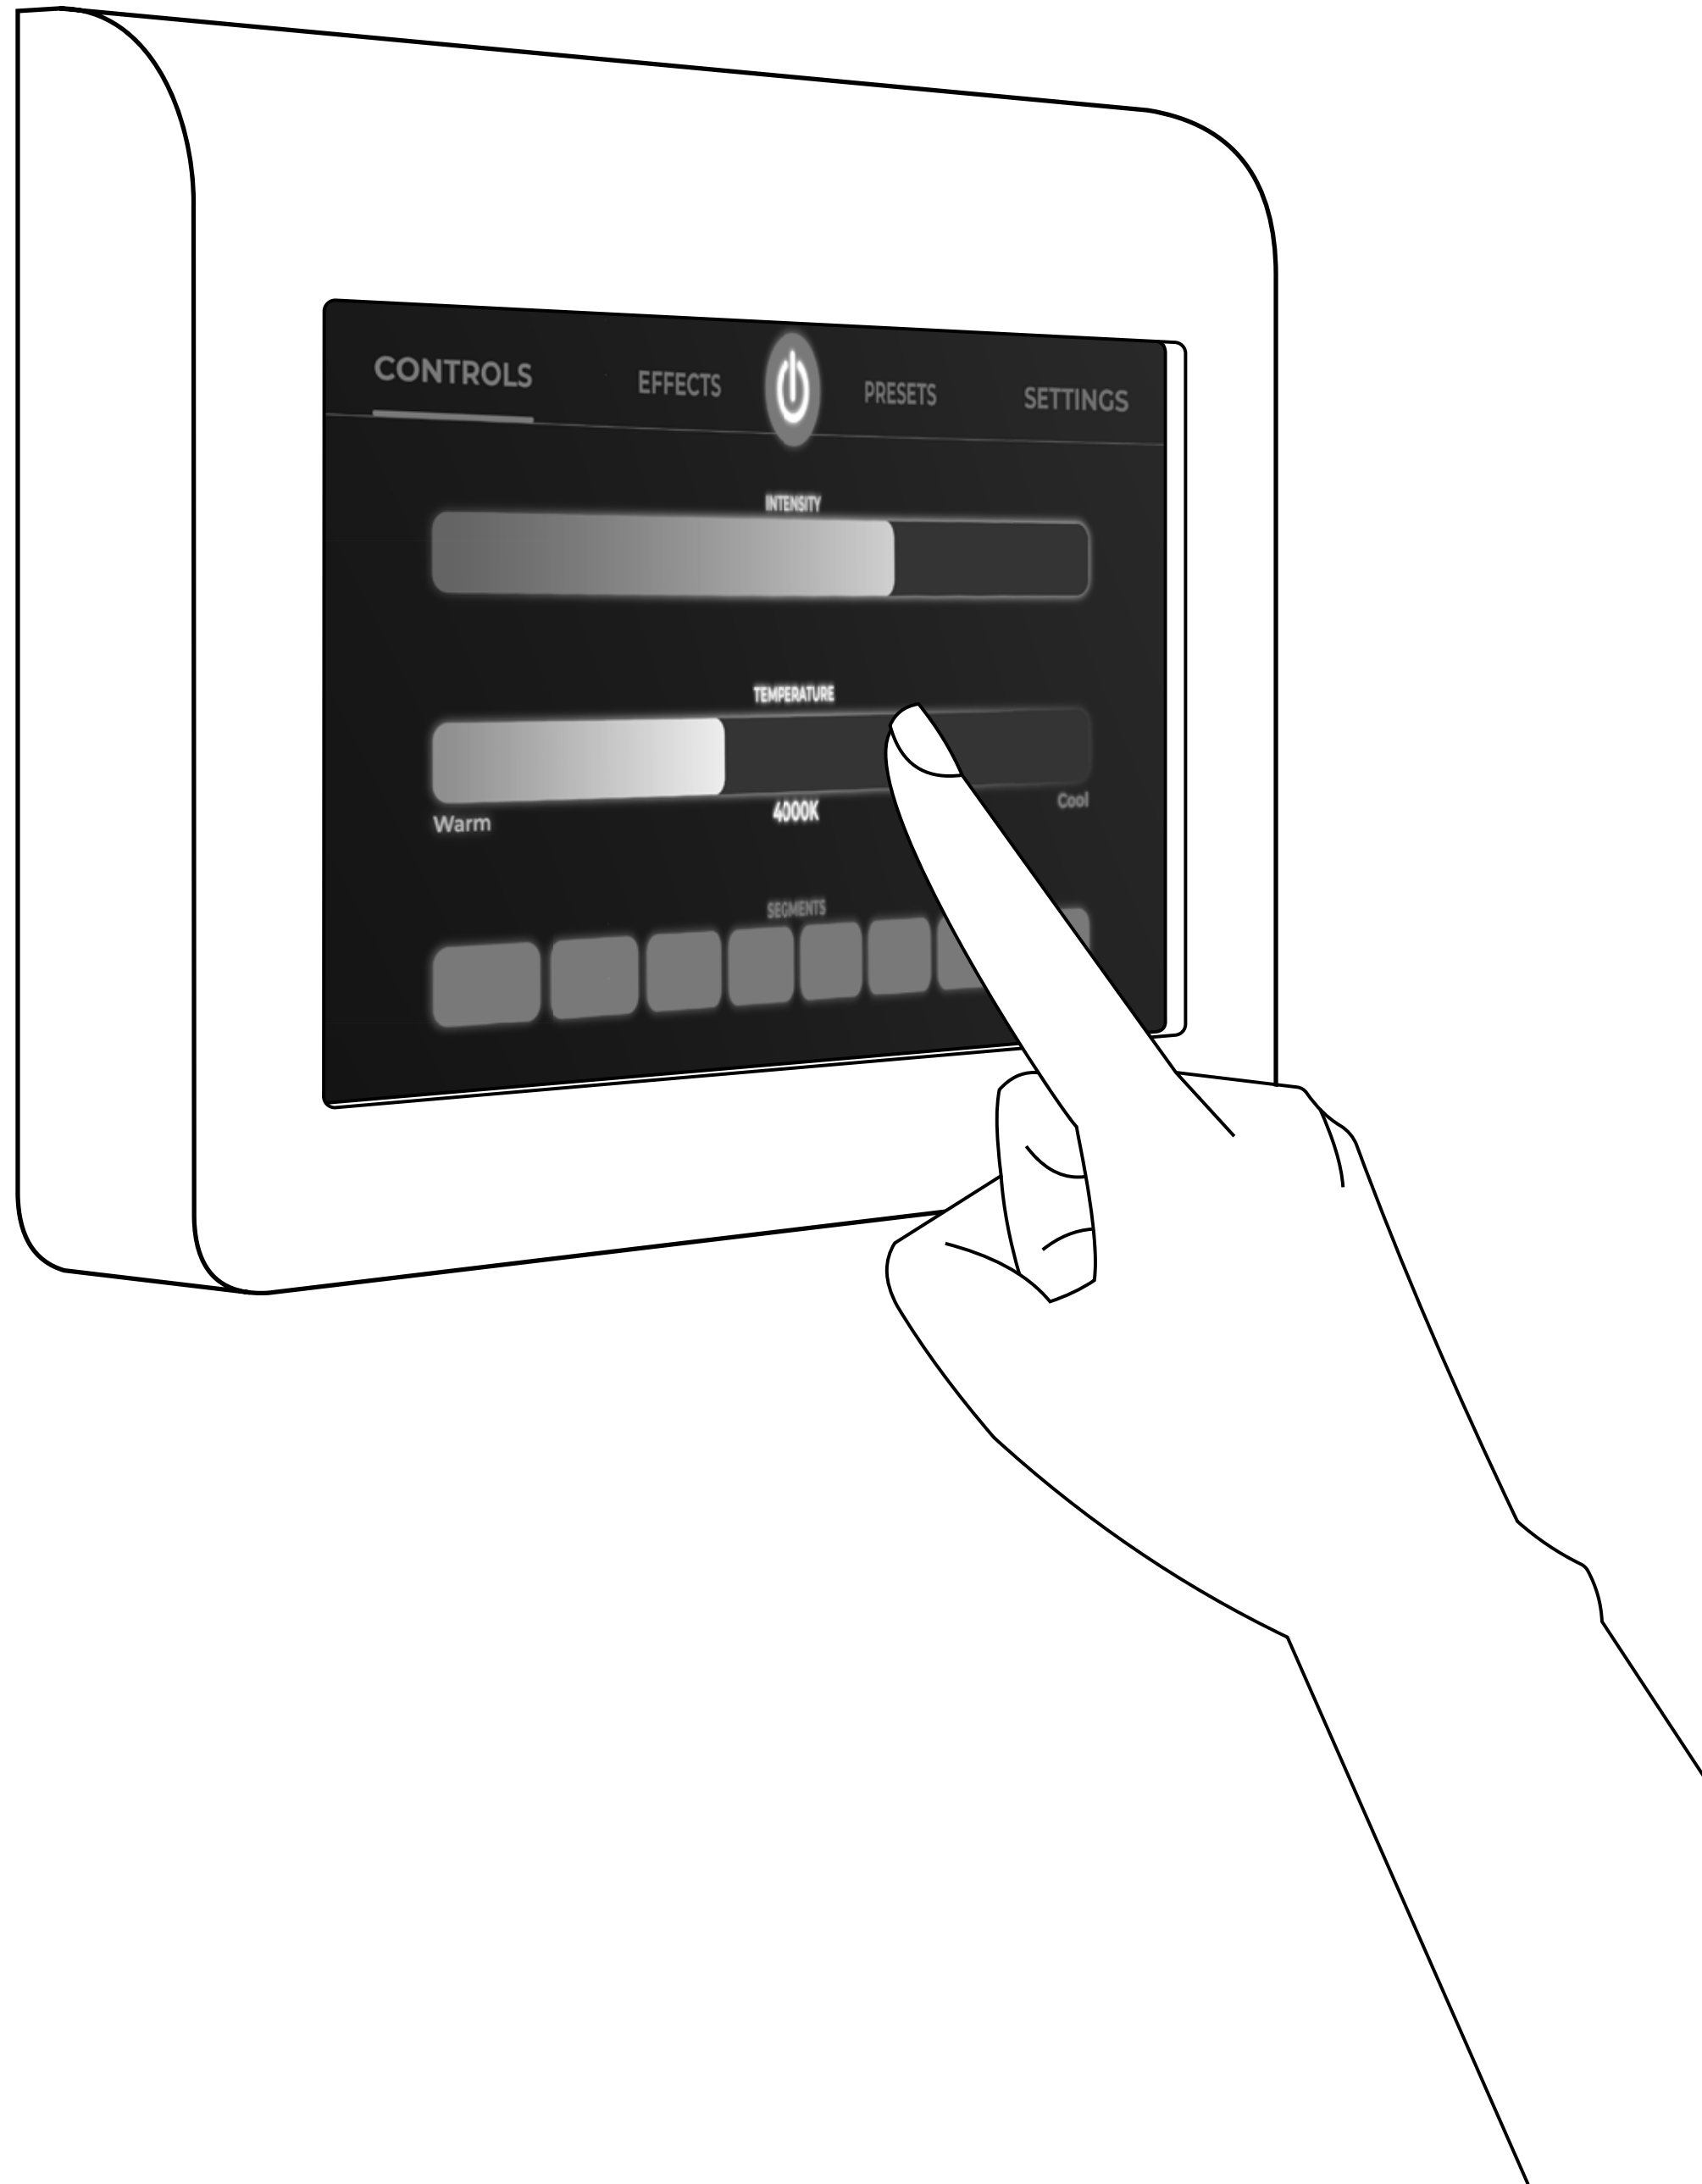

Adaptable **Three levels of adjustment**

Easy
to clean
and install **Enclosed**

Atmosphere at the touch of a finger

Touch Pad and App Control Options

LightEFX gives designers intuitive, flexible control through a low profile touch pad and a powerful app that enables precise adjustment of the lighting environment. Multiple fixtures can be linked within the LightEFX ecosystem, allowing you to synchronise or zone lighting across an entire space with effortless coordination.

One Fixture Unlimited Moods

Changing the RGB lighting instantly shifts the room's atmosphere, from calm and restorative to vibrant and energetic, allowing the space to adapt its mood to the moment with a simple colour change.

- **Shapes the mood instantly:** colours can make a space feel calm, energised, or focused.
- **Enhances user experience:** lighting can support relaxation, creativity, or productivity.
- **Defines the room's purpose:** shift from work mode to ambience mode with a single colour change.
- **Improves visual comfort:** softer hues reduce harshness and help balance the environment.
- **Supports branding and themes:** match colours to events, identity, or desired atmosphere.
- **Creates dynamic, adaptable spaces:** one room can serve multiple functions through lighting alone.
